

# Vision and Priorities

## Vision

We will set the conditions and achieve the goals set forth in the Marine Corps University Strategic Plan. Our main effort is our student populations, their education, and their leadership development. Across all elements of the Command, facilities construction, learning environment development, and our accreditation remain critical supporting efforts. Likewise, our ability to leverage, synergize, and innovate across all elements of the Command will increase both efficiency and excellence. Preserving, promoting and presenting Marine Corps history and heritage is paramount. We will be committed to, and sustained by, our families.

## Priorities

1. Our Students. Whether officer or enlisted, civilian or international, resident or non-resident, we will do everything in our power to provide the best possible learning experience to our students in order to produce knowledgeable, thinking leaders who can successfully operate, fight, and win across both the levels of war and the range of military operations, in any clime or place.
2. Accreditation. Key to our credibility as an organization, is our ability to maintain accreditation. We will devote significant effort to ensuring we sustain our ability to award Master's Degrees, confer JPME credit, and maintain excellence within the National Museum Community.
3. Military Construction (MILCON). The University's MILCON Master Plan and the National Museum of the Marine Corps' Phase II construction efforts must remain on-track. We will focus continuously on this goal and scrutinize closely initiatives that detract from the planned end states.
4. Safeguard the fabric of our Corps. Preserving, promoting, and displaying Marine Corps history and heritage is a mission we are honored to perform and will embrace fully. Consolidation, categorization, and access (electronic and physical) to our historic archives and artifacts comprise our near-term focus.
5. Synergy and innovation. Our organization contains many diverse components that all contribute significantly to the Command's mission. We must identify and exploit areas of mutual benefit among subordinate elements and look for opportunities to synergize our efforts and embrace efficiencies. We will create an environment where innovation, creativity, and imagination become the catalyst for opportunity and for challenge mitigation.
